

Nordic Energy Services, LLC
Environmental Disclosure Statement

Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. Nordic Energy Services, LLC. reports to its customers fuel sources and emissions data provided by PJM Interconnection (PJM), the local regional transmission organization. The following distribution of energy resources was used to produce electricity in the PJM region, and represents all resources used.

Sources of Electricity Table as of 12/31/22

Sources of Electricity	Nordic System Mix	PJM System Mix
Coal	20.16%	20.16%
Oil	0.22%	0.22%
Natural Gas	40.08%	40.08%
Nuclear	32.69%	32.69%
Other	0.09%	0.09%
Renewable Energy:		
Solar	1.11%	1.11%
Wind	3.79%	3.79%
Biomass	0.19%	0.19%
Captured Methane Gas	0.21%	0.21%
Water	0.99%	0.99%
Geothermal	0.00%	0.00%
Municipal Solid Waste	0.48%	0.48%
Renewable Energy Resources Subtotal	6.77%	6.77%
TOTAL	100.00%	100.00%

Air Emissions

lbs/MWh Nitrogen Oxides (NOX), Sulfur Dioxide (SO2), and Carbon Dioxide (CO2) emitted for the 12 months ending 12/31/22	
Carbon Dioxide	810.84 lbs
Nitrogen Oxides	0.33 lbs
Sulfur Dioxide	0.44 lbs
Carbon Dioxide (CO2) is a "greenhouse gas" which may contribute to global climate change. Sulfur Dioxide (SO2) and Nitrogen Oxides (NOx) released into the atmosphere react to form acid rain. Nitrogen Oxides also react to form ground level ozone, an unhealthy component of "smog".	

The PJM System Mix represents all resources used for electricity generation in the region. All fuel mix and emissions data are calculated from the PJM System. The sum of the individual fuel sources may not equal 100% due to rounding.

The PJM System Mix data represents the period from January 2022 – December 2022, the most recent available data. This disclosure is required by the District of Columbia Public Service Commission. For additional information, please contact Nordic Energy Services, LLC at <https://www.nordicenergy-us.com/> or by phone at (877) 808-1022.
